These bloom about the same time as Darwin and Breeder Tulips and comprise many beautiful colors that are not to be found in those classes. The flowers are of a more pointed and often of reflexed form, many of which are deliciously perfumed.

In preparing a bed have it so shaped that it will shed water, and the soil should be worked deep and made rich. Plant from 3 to 4 inches deep, according to the stiffness of the soil, and 6 inches apart each way, and protect with leaves or coarse manure.

FANTASY

The Finest Tulip Novelty of Recent Introduction

FANTASY is a glorious Parrot-type Tulip with a straight, strong stem, and is a sport from the Darwin Tulip, Clara Butt. It has exactly the same beautiful true pink color, except that the inside of the flower is more intense, while it has the shape of a Parrot Tulip. The petals of this quaint and beautiful flower are lacinated, the outer sides or backs being artistically marked with apple-green. It grows to the same height as Clara Butt and blooms at the same time outdoors.

Hyacinths

CULTURE IN POTS: Use any good soil, mixed with sand, potting so as to leave the top of the bulb even with the soil. For a single plant use a 4 or 5 inch pot; but the effect will be prettier if several bulbs are planted in a larger pot, and still more effective if all are of one color. Press the soil firmly around the bulbs, but do not pack it under. Water thoroughly and place in cool, dark place for 4 or 5 weeks, watering about every 10 days, enough to keep the soil moist.

A still better plan is to sink the pot in the earth about 6 inches, covering with soil, choosing a location that is not too wet. For a succession of bloom, bring the first out about December 1st, and every 2 weeks thereafter until February 1st. Keep moderately warm and when they begin to bloom, give plenty of water, and as much fresh air as possible. Too much heat dries up the flower and shortens the blooming period.

CULTURE IN OPEN GROUND: Any good garden soil will suit Hyacinths, and the planting depth should be determined by the character of the soil. If clay or very heavy, do not cover more than 3 inches; if light, from 4 to 6 inches. Protect with manure, leaves or coarse litter to prevent freezing.

Wood's Superior Hyacinths in Separate Colors

Can be sold at considerably less price than where it is necessary to keep and name each individual bulb separately. These bulbs are all good sized flowering bulbs, much larger than the ordinary mixed Hyacinths, and give excellent satisfaction for general forcing, for cut flowers, or outdoor garden blooming in beds or borders.

Can furnish them in Pure White, Pink, Red, Light Blue, Dark Blue, Yellow and Mixed Colors.

All of the above: 12c each; $1.00 per doz.; $7.25 per 100.

Roman Hyacinths - White, Pink and Blue

The flowers, while smaller than those of the Dutch Hyacinths, are borne in much greater abundance, each producing about 6 graceful spikes of bloom, which makes it a most valuable sort for cutting. They can be forced very easily, and if planted early and brought into the house at intervals of about 2 weeks, will yield a succession of blooms from Christmas to Easter.

Giant White Narcissus

The Most Satisfactory Winter-Blooming House Plant

They will bloom in water from 6 to 8 weeks from time of planting, if not planted too early, and are superior to Chinese Lilies or any other Narcissus for growing in water. The flowers are larger, more attractive in color and very fragrant. A very unique and simple way to grow them is to place 6 or 8 bulbs in a shallow bowl with water; support the bulbs with pebbles, and place the bowl in the dark until the roots have started, when they should be brought into the light. Change the water occasionally to keep it pure. From our experiments November, December and January plantings give best results.

How to Grow Daffodils

CULTURE IN WATER: See under description of Giant White Narcissus for growing in water.

CULTURE OUT-OF-DOORS: All varieties of Narcissus should be grown in clumps and patches in every suitable spot, and there is not a spot where grass will grow in which Narcissus will not succeed. In planting be guided by the size of the bulb, allowing 4 to 5 inches between small sorts and 6 to 8 inches between large varieties. The bulbs will soon completely fill the space, forming a compact mass, and it is then their flowers are produced the most freely. Plant about 5 inches deep, according to the size of the bulb.

Bulbs for the Rock Garden

ANEMONES
Anemones should be planted the latest part of October; 3 inches deep and about 6 inches apart. They will do well on any well-drained loam soil so long as it is not lacking in lime. ST. BRIGID (Semi-Double). Mostly double, with finely divided petals, and the most brilliant and variegated shades, all having a handsome blue-black central base. Very graceful. 75c per doz.; $5.00 per 100.

BLEEDING HEART
(Dicelytra Spectabilis). One of the most showy of the old-fashioned flowering plants. The flowers are heart-shaped, vary from light pink to a rosy crimson color, and are produced in sprays along the stem. They can be grown in either shady or sunny places, although they are more at home in the shade. Large roots, 35c each; $5.75 per doz.

CROCUS
One of the earliest blooming spring flowers and very effective in lawns and borders. They show off very prettily when planted in the turf of a lawn. When planted in the lawn, make a small hole about 2 inches deep with a dibble or sharp-pointed stick, and then cover with a little extra soil. They can be planted in this way without disturbing the appearance of the lawn. After flowering, the cutting of the grass does not injure the bulbs, and they will appear year after year, proving an ever-recurring delight in the early spring. They are also very useful to plant in Hyacinth or Tulip beds between the rows, thereby giving a succession of early flowers. Set the bulbs 2 inches deep and 2 to 3 inches apart and plant as early in the fall as possible.

Large Flowering Named Crocus
Flowers much larger and bolder in greater profusion than the mixed sorts. These bloom well in the house, planted 2 inches apart in shallow boxes of loamy soil.

ALBION. Fine dark purple. 40c per doz.; $2.50 per 100.
MONT BLANC. Pure white. 40c per doz.; $2.50 per 100.

WOOD'S SPECIAL NAMED VARIETIES MIXED. 40c per doz.; $2.25 per 100.

ERANTHIS HYEMALIS (Winter Anemone). Early in spring the golden blossoms look charming, resting on an emerald-green cushion of leaves, and forming a striking contrast to the Snowdrops, Scillas and Chionodoxa. The foliage remains long after the flowers, making the plant especially valuable in moist situations, such as under trees, which the Winter Anemone enjoys, and where few other flowering plants will thrive. Plant firmly, 2 inches deep, about 11 bulbs to the square foot. 40c per doz.; $2.50 per 100.

FRIITILLARIA
Singular dwarf spring-flowering plants, bearing large pendent, bell-shaped flowers of various colors—yellow, white, black, purple, striped and splashed, and checkered in the most curious way. Invaluable and exceedingly pretty when grown in large groups in the garden border or wild, dry situation.

IMPERIALIS. 35c each; $3.50 per doz.
MELAFRIGRIS. 40c per doz.; $2.50 per 100.

LEUCOJUM (Snowflake). VERNUM. A white flower, resembling the Snowdrop, but much larger. Plant in clumps, 3 inches deep. 75c per doz.; $5.00 per 100.

LILY-OF-THE-VALLEY
(For outdoor planting only). Small pure white flowers. Plant in a shady, moist place. 65c per doz.; $4.25 per 100.

MUSCARI
(Grape Hyacinth). Small round flowers, growing on the stem like small Hyacinths. Flowering in late April. Heavenly blue. 40c per doz.; $2.50 per 100.
WHITE. 40c per doz.; $2.75 per 100.

RANUNCULUS
Plant and treat same as Anemones. Mixed Colors, 65c per doz.; $4.25 per 100.

SCILLA CAMPANULA-LATA (Wood Hyacinth). Bears spikes 11 inches high of bell-like flowers, during early May. Plant 5 or 6 inches deep in shady situations. Very effective for borders; will grow under fir or pine trees. White, Blue and Rose. 40c per doz.; $2.50 per 100.

SCILLA NUTANS (English Bluebells). Similar to Campanula but spikes are not as tall and are more arching in character. 40c per doz.; $2.50 per 100.

SCILLA SIBIRICA. Spikes 1 to 4 inches high, of small, drooping bell-like flowers. Fine for massing in borders or naturalizing. Plant 3 to 4 inches deep. Blooms in April. 40c per doz.; $2.50 per 100.

SNOWDROP
The first flower to proclaim the coming of spring, frequently blooming in the snow. The pure white, bell-shaped blooms come before winter departs. 45c per doz.; $3.00 per 100.

NARCISSUS for Rock Gardens

BULBOCODIUM CONSPICUUS. A lovely little flower of rich yellow. Grows only 6 inches high, with rush-like foliage; flowers about an inch wide. 15c each; $1.20 per 100.

TRIANDRUS THALIA (Orchid Narcissus). An exquisite flower with 3 or 4 pure white flowers on one stem. One of the finest and daintiest whites. 20c each; $2.00 per 100.

W. P. MÍLNÉR, Small, free flowering, with white trumpet and perianth. Very satisfactory for rock gardens, and blooms generously for years. May also be forced in bowels. Grows only 10 to 11 inches tall. 20c each; $2.00 per doz.
